## PROJECTS

### calmversation Web Developer + Project Manager

- Calmversation learning foundation offers courses that ensure students and teachers have a socially innovative approach to learning
- Worked with a team of 4 to provide consumers with a simple and intuitive UX/UI
- Facilitated meetings daily through slack and in-person between designers and developers to ensure client goals and requirements were met on time
- Worked with WordPress and PHP with MYSQL as the back-end. We used PHP to create the sites structure and added post types, custom field types, and plugins
- With MYSQL I was able to maintain the security of the site and move it to the respected domain
- Frequently compiled and merged the team's code to debug and test the website for any errors allowing an immediate fix.

### Instanews HTML5 CSS3 ES6 API Ajax jQuery

- Instanews is a responsive web application that allows users to access NY Times articles based on genres chosen
- With the API provided by the NY Times, it fetches the latest news articles and displays them on the site with a summary and photo
- I used HTML5, CSS3, and JavaScript to create the website while maintaining the best practices
- With JavaScript it allowed me to select how many are being displayed without affecting the performance of the site
- Working HTML5 and CSS3, I create an easily readable and maintainable code that allows users to clone and edit

### Inhabitant WordPress PHP Gulp Sass

- Inhabitant is a WordPress site which allows consumers to rent camping equipment, cars, and anything to make the camping experience effortless
- Built with WordPress, PHP, Gulp, Sass, and new HTML semantics. With Gulp, it allowed instant web refreshes which made debugging and editing code more time efficient
- Inhabitant consist of multiple WordPress pages which would enable each page designed differently

### Pong Game ES6 Webpack

- Pong is a recreation of the original Pong game created in 1972 but with more options and a modern look
- Built Pong with JavaScript ES6 which allowed new features like class, arrow functions, and scope.
- Frequently tested the game to ensure it played smoothly and bugs were not present
- Using Webpack, it allows files like SASS and JavaScript files with modules and bundles them into standard JS, and CSS file.
- Webpack creates a more efficient site because it minimizes extensive CSS and JS files into two lines of code

## STRENGTHS

 **Growth**  
always seeking to improve me whether its coding or self-improvement

 **Results**  
Focused on delivering the task with proficiency and quality

 **Earn Trust of Others**  
Listen attentively, speak candidly, and treat others respectfully

## TECHNICAL SKILLS

### Code

HTML 5 CSS3 JavaScript

JQuery Sass WordPress

ES6 PHP React

Node Git Github

Gulp React Native API

WebStorm Webpack MYSQL

### Design

Adobe Photoshop

Adobe Lightroom

### Project Management

Slack

Trello

## PROJECTS

---

### React Recipe App

✍ React API JavaScript

- This recipe app collects data from an API provided by Edamam and displays them with recipes and caloric value
- React is the most popular JS library, which allows creating large web applications that can change data, without reloading the page.
- With the search bar, you can use keywords and find any recipes you desire and click into it to see the full recipe.

## WORK EXPERIENCE

---

### Champs Sports Canada

Sales Associate

📅 Aug 2014 - Present

- Work in a team to effectively achieve daily goals and sales initiatives
- Received recognition for most insoles, shoe care sold, and top sales per hour
- Receive and organize large shipments and sort in designated aisles
- Provide excellent customer service through effective communication
- Take the initiative under little to no supervision from management

### Bistro 101

Chef de Partie

📅 Sept 2015 - March 2016

- Facilitated meetings before service to ensure a smooth service
- Managed designated stations effectively while maintaining a tidy workspace
